OASIS Symposium- Holistic Care in Hirschsprung's Disease

27.-29.07.2023 in Rostock-Warnemünde

Patient centred care in Hirschsprung's Disease (HSCR) and Total Colonic Aganglionosis (TCA) – Optimizing the pathway of care – including pre- and postoperative care

kinderchirurgie.med.uni-rostock.de

Dear colleagues,

We are pleased to invite you to our Summer Symposium on Holistic Care in Hirschsprung Disease.

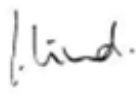

We are honoured to organise the first Pan-European Scientific Symposium focusing on holistic care in Hirschsprung Disease and Total Colonic Aganglionosis.

This collaboration between clinicians and patient associations from Poland, UK, Italy, Netherlands, Austria and Germany will take place in Warnemünde organised by the Rostock Colorectal Centre. Together, clinicians, researchers, and patient representatives will discuss how to best enable holistic care in Hirschsprung Disease.

We will discuss existing models of care and aim to develop pathways for holistic care in European collaboration. During our symposium patient concerns will always be the centre of attention.

Stefanie Märzheuser

Judith Lindert

Day 1 09:00 - 18:00

- 09:00 Welcome
- 09:15 Common needs in uncommon conditions: core components that reflect the need of parents and patients in A) Hirschsprung Disease and B) total colonic aganglionosis
